## Here is what the critics have to say...

"The AT-1 has an amazing bottom end combined with other qualities that will put many a more expensive speaker to shame."

- Thomas J. Norton, Home Theater magazine

"What most impressed me about the AT-1 was the clarity and articulation of the midrange and the almost holographic sound-stage of the imaging."

- Greg Borrowman, Australian hi-fi and home theatre magazine

"The AT-1s produce more bass at 31.5 Hz than my reference loudspeakers. The bottom end was so powerful, it was amazing that there was no subwoofer helping."

-Doug Blackburn, Widescreen Review magazine

"The AT-1's bass was impressive—deep and powerful, taut and tuneful... The AT-1 is the bee's knees. It offers a colorful, open midrange; coherent, extended, and powerful bass; great fit 'n finish; and is relatively forgiving of room placement."

- Erick Lichte, Stereophile magazine

"The Atlantic Technology AT-1 H-PAS speakers' overall performance/value quotient is difficult to overstate."

- Daniel Kumin, Sound&Vision magazine

"AT-1's H-PAS is really something: As soon as the kick drum started playing, Wow! Amazing! It sounded as if I had added a high-quality subwoofer."

- Audiotechnique magazine, Hong Kong
