

AW-424 Paint Shield

Place This Paint Shield Over Drivers Before Painting Cabinet

To prepare for painting:

- **Remove the bracket.**
- **Use a paper clip or awl to remove the grille. Gently pull the grille at each corner until it can be removed by hand.**
- **Place the Paint Mask over the drivers to prevent them from being painted. Be careful not to press too hard and damage the tweeter.**
- **Wrap masking tape around the threaded posts of the knobs and the connection terminals.**
- **Use a small piece of masking tape to cover the threaded inserts at each end of the cabinet.**
- **Use the clean, dry cloth to wipe any dust or dirt off the cabinet before painting.**

Refer to page 6 in the manual for complete details.

You can paint the
AW-424 to blend
in perfectly
with its
surroundings.
