

Atlantic has cornered the subwoofer market

Out of sight bass (you can take that both ways)

Atlantic Technology—the company you count on for innovative solutions for quality sound—has done it again.

Here's the dilemma: You want great bass but you don't want to see the subwoofer. Installing an in-wall subwoofer is not an option. Think all is lost? Well here's the perfect answer: Atlantic's 10 CSB In-Corner Subwoofer.

The 10 CSB utilizes a super heavy-duty 10-inch driver and high-powered amplifier that join together to really pump out the bass. The enclosure is

shaped to snug unobtrusively right into the corner, unseen, but definitely not unheard! In addition to hiding the subwoofer, corner mounting actually reinforces the bass. The attractive satin black cabinet can be painted to match the walls and blend in even better. The days of the "ugly box" sub are gone forever—and no walls to cut!

Our 10 CSB corner sub is just the latest in a series of "How-come-nobody-else-thought-of-that?" solutions from Atlantic technology. Contact us today for the whole story.
