

FS-5000 Flat Screen Speaker System

A higher performance all-in-one for flat panel displays

Home Theater could be the most enjoyable, significant development in at-home entertainment to come along in a generation. Being able to literally "go to the movies" in one's own living room has completely transformed the experience of watching television.

Great sound is an integral, essential component to the theater experience at home. The downside for most people comes from having to mount and wire speakers all over their room. It's inconvenient, confusing, and unsightly.

Enter Atlantic's innovative FS-5000 Front Stage Loudspeaker. Based upon our acclaimed FS-4000, this sleek, 50"-long unit contains three, more powerful, front speakers—left, center, and right—in a single enclosure. It's perfect for the growing number of customers who just want a simple, attractive, one-piece speaker solution under their flat-screen television, without all the visual clutter of separate left, center, and right speakers surrounding their stylish, thin TV. The cabinet is internally separated into three chambers, each with a 1" tweeter and two 4½" magnetically-shielded woofers. Bass response extends down to 70Hz, for full-bodied sound even without a subwoofer.

All three speakers in the FS-5000 have two rear-panel controls—a 3-position HF Energy switch and a 2-position Boundary Compensation switch—to optimize the speakers' performance regardless of room acoustics or placement. These controls allow the FS-5000 to always sound its best.

The FS-5000 uses the same driver and crossover technology as our highly-acclaimed 2200, FS-3200 and FS-4000 systems, so there is absolutely no compromise in sound quality or tonal accuracy by having the three front channels in a single enclosure. With the FS-5000, it's now possible to enjoy the legendary Atlantic sound from speakers that blend right into the room.

Mounting Options

Four mounting options, included with speakers:

1. "Straight Ahead" wall bracket holds the speaker 1/2" off the wall pointing straight ahead.

2. "Angled" wall bracket—angles the speaker up or down, depending on whether it's mounted above or below the video display.

3. Keyhole mount (on the rear of the speaker), for simple flush wall mounting.

4. Using Atlantic's exclusive center channel rocker base, the FS-5000 can be used as a freestanding speaker on a TV or on a shelf.

Notice that the FS-5000's tweeters are offset above the centerline of the woofers. This is a perfect example of the way that Atlantic pays close attention to acoustic details. By moving the tweeters up, we significantly reduce the audibly-intrusive interference patterns that result from woofers and tweeters being mounted side-by-side.

Gloss Black Finish

Specifications

	FS-5000
Type	Two-way, sealed box
Drivers	Woofer (6) 4 1/2" (115mm) GLH [§] Tweeter (3) 1" (25mm) soft dome
Frequency Response	70Hz - 20kHz ±3dB
Nominal Impedance	8 Ohms
Crossover Frequency	3.75kHz, 3rd order
Sensitivity	89dB
Recommended Power	10 - 150 Watts RMS per channel
Magnetic Shielding	Yes
Dimensions w/grille (W x H x D)	50 x 6.5 x 5"* 1270 x 165 x 127mm
Weight	37lbs; 16.8kg

[§]Graphite Loaded Homopolymer

*Height without base. Add 1" height for base.
